On some engines, two or more References the same product can be fitted, indicate may have one or more at the same time. Example: Volkswagen fits two oil pressure switch in the same engine, but it's possible that it may have various, we see Applications. To identificate the correct switch by matching the colour of plastic, to that of the unit you are replacing. Example: one to be fitted on the upper part of the engine block (cylinder head) and another on the coolant temperature the engine mounting.
Some componenets for Tractors and Heavy Duty Vehicles are not listed in the Vehicle Application, but can be found in the Cross Reference List and/ or Illustrated section of the Catalogue.

Algunos motores pueden montar dos o más Referencias del mismo producto, independientemente cualquiera de ellas o varias a la vez. Por ejemplo, Volkswagen monta dos o mas interruptores presión de aceite en el mismo motor, pero vemos que puede llevar varios, como indicamos en las Aplicaciones. La identificación se realiza a través del color del conector, mismo color, misma ubicación de montaje.
Algunos componentes para Tractores y Vehículos Industriales no están incluidos en la Lista de Aplicaciones, pero se encuentran en el Cruce de Referencias y/o en la parte Ilustrada del Catálogo.

Certains moteurs sont équipés par deux ou plusieurs Références dans la même producte, indépendamment l'une ou plusieurs de ces Références. Exemple: Volkswagen est equipé avec deux interrupteur pression d'huile dans la même moteur, mais peut avoir incorporé plusieurs, voir Applications pour Véhicules. L'identification est faite grâce à la couleur de la partie en plastique. Example: un est montée sur la partie haute du moteur (culasse) et l'autre sur l'ensemble du liquide de Refroidissement du compartiment moteur.
Certains composants pour Tracteurs et Véhicules Industriels ne sont pas inclus dans les Applications pour Véhicules, mais sont repérés dans le Tableau des Equivalences et/ou partie illustrée du Catalogue.
