

OEM & AFTERMARKET SOLUTIONS

WE ARE EUROPEAN MANUFACTURERS SINCE 1952

At **FAE** we manufacture electrical and electronic components for the automotive sector, experts in design, development and manufacture of IAM and OEM products. With more than 5,000 references, we export 75% to our clients located in more than 100 countries.

FAE is a family company located in Barcelona, with two production facilities which cover a total area of 17,000 m² between the two plants. We consolidate our position in the sector of design of multilayer ceramic applications, development of ceramic substrates and implementation of microelectronic systems thanks to the 700 m² type ISO-7 Clean Room. We also have a 180 m² ESD room to manufacture our electronic components, among others, GPS (Gear Position Sensor), Pressure Sensors and Exhaust Gas Pressure Sensors.

Customer satisfaction is our main driving force behind our future, which is why we guarantee at all times the quality and reliability of all the parts manufactured through automated processes within the production chain and subjected to exhaustive quality controls.

At **FAE** we are committed to Industry 4.0, all machines and test equipments are connected to the Engineering department, which knows at all times what processes are being developed and under which parameters.
